Operations Section Chief

BoCC meeting | May 19, 2021

Moving to Low Risk

Deschutes County moves to low risk on Friday, May 21.

- Restaurants: Indoor dining – 50% capacity, outdoor dining – 300 people maximum.
- Indoor recreation, fitness and entertainment: 50% capacity
- Outdoor recreation, fitness and entertainment: 50% capacity
- Retail stores : 75% capacity

it's your turn: available now at pharmacies,
primary care clinics & pop-up clinics

COVID-19 Case Counts by Week

Data for this week is not yet shown. Data are shown based on the date a case first became identified as a case.

Data is subject to change

COVID-19 Cases Remain High

Similar to what we've seen:

Not wearing a mask – Social gatherings – Afterschool activities/ carpooling – Travel

We can prevent this:

- ✓ **Wear a mask**
- ✓ **Socialize outdoors**
- ✓ **Keep some distance**

Vaccinate & Test

Vaccines help avoid quarantine

If you're fully vaccinated and you're exposed to someone who has COVID, you do not have to quarantine (as long as you don't have symptoms).

If you're *not* fully vaccinated and you're exposed to someone who has COVID, you do have to quarantine for 14 days.

free COVID-19 testing

Downtown Bend
Thursdays in May
9 a.m. to 2 p.m.

www.deschutes.org/covidtesting

COVID-19 vs. Allergies

	COVID-19	Allergies
 Common	Fever or chills	
	Cough	
	Body aches	
	Headaches	
 Less Common	Tiredness	
	Loss of taste or smell	
	Shortness of breath	 *
 Not Common	Sore throat	
	Sneezing	
	Itchy or watery eyes	
	Runny or stuffy nose	
		

*Seasonal allergies do not usually cause shortness of breath, unless a person has a respiratory condition such as asthma that can be triggered by pollen.

New Mask Guidance for Oregon

Oregon's new mask guidance

Yes, I am fully vaccinated.

I can go without my mask and I don't need to physically distance in businesses that are checking my vaccination status.

and

No, I am not fully vaccinated.

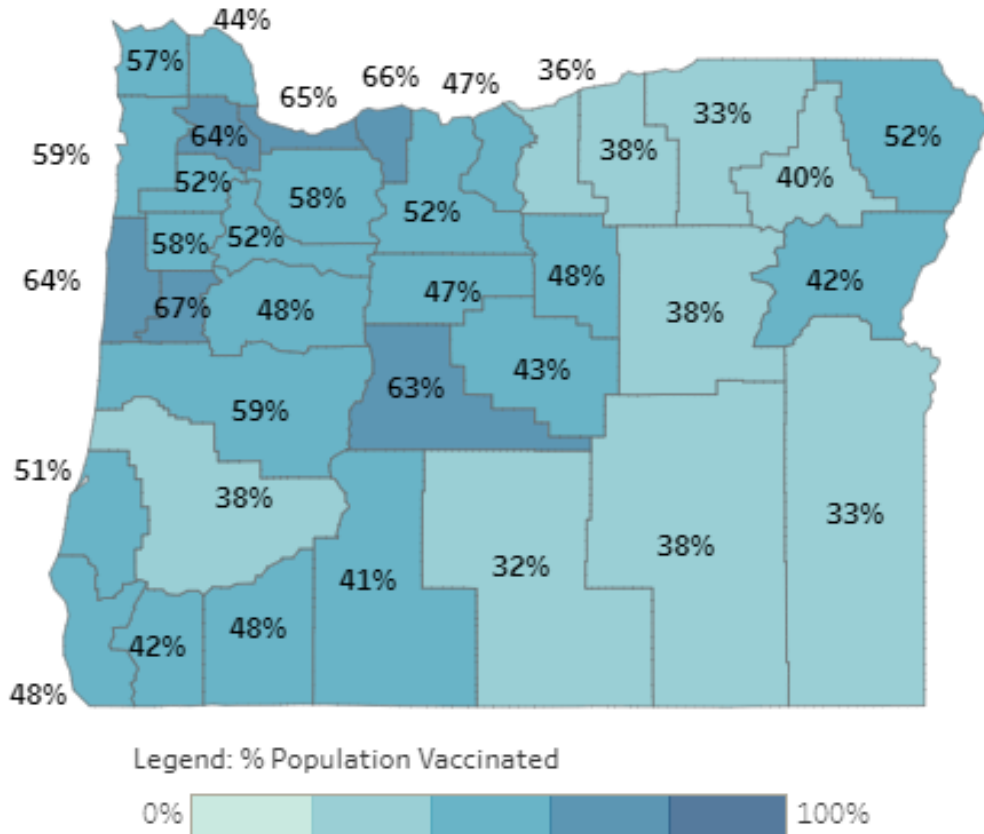

I still need to wear my mask and physically distance in businesses that are checking vaccination status.

and

I still need to wear my mask and I need to physically distance in businesses that are continuing to require a mask.

COVID-19 Vaccinations in Deschutes County

Eligible pop. with series in progress	9.7%
Eligible pop. fully vaccinated	52.9%
Eligible pop. vaccinated*	63%
Total people vaccinated per 10,000 population*	5,107

*Includes people with vaccination series in progress or fully vaccinated

Data as of 5/17/2021

Reopening & risk levels

Beginning May 21, counties eligible for option to move to Lower Risk when:

- 65% of county residents 16 and older receive first dose
- A vaccine equity plan is submitted and approved

Most restrictions to be lifted statewide when 70% of Oregonians 16 and older receive first dose.

COVID-19 Vaccinations in Deschutes County

Vaccination Rates per 10,000 population, by county of residence*

People vaccinated per 10,000: lighter colors represent counties with lower vaccination rates, while darker colors represent counties with higher vaccination rates.

People with vaccination series in progress	19,521
People fully vaccinated	78,418
Total people vaccinated*	97,939
Total people vaccinated per 10,000 population*	4,971

*Includes people with vaccination series in progress or fully vaccinated

Data as of 5/10/2021

Recovery from COVID-19 can take a long time, even in young adults with no chronic conditions

1 in 5

previously healthy young adults* weren't back to usual health 14-21 days after testing positive

*ages 18-34
Random sample of adult outpatients with COVID-19 from 14 U.S. academic health care systems

To stay well and protect others...

Stay 6 feet away from others not living in your household

Wash hands often

Wear face coverings consistently and correctly in public

Why are COVID-19 cases in Oregon rising?

Along with increased social gatherings without face coverings, **more transmissible variants are in Oregon.**

Variants of concern have **mutations** in the virus genome that **cause the virus to act differently.**

One variant, B.1.1.7, has now become the dominant variant in Oregon statewide. B.1.1.7 is 50% more transmissible and may cause more severe disease.

The good news is that it appears that **COVID-19 vaccines are effective against variant B.1.1.7.**

Real-world data show vaccination* **reduced the risk** for COVID-19 hospitalization among adults 65 and older†

Vaccination is a critical tool to **reduce severe COVID-19** in adults 65 and older

* Receipt of Pfizer-BioNTech or Moderna 2-dose vaccine series

† Patients enrolled from 24 U.S. hospitals in 14 states

Choosing Safer Activities

	Unvaccinated People	Your Activity	Fully Vaccinated People
		Outdoor	
Safest		Walk, run, or bike outdoors with members of your household	
		Attend a small, outdoor gathering with fully vaccinated family and friends	
		Attend a small, outdoor gathering with fully vaccinated and unvaccinated people	
Less Safe		Dine at an outdoor restaurant with friends from multiple households	
Least Safe		Attend a crowded, outdoor event, like a live performance, parade, or sports event	
		Indoor	
Less Safe		Visit a barber or hair salon	
		Go to an uncrowded, indoor shopping center or museum	
		Ride public transport with limited occupancy	
		Attend a small, indoor gathering of fully vaccinated and unvaccinated people from multiple households	
Least Safe		Go to an indoor movie theater	
		Attend a full-capacity worship service	
		Sing in an indoor chorus	
		Eat at an indoor restaurant or bar	
		Participate in an indoor, high intensity exercise class	

Get a COVID-19 vaccine

Prevention measures not needed

Take prevention measures

Fully vaccinated people: wear a mask
Unvaccinated people: wear a mask, stay 6 feet apart, and wash your hands.

- Safety levels assume the recommended prevention measures are followed, both by the individual and the venue (if applicable).
- CDC cannot provide the specific risk level for every activity in every community. It is important to consider your own personal situation and the risk to you, your family, and your community before venturing out.

Extreme Risk

Summary of changes:

- No indoor dining – outdoor dining allowed
- Reduced retail capacity
- Reduced indoor fitness and recreation facility capacity
- Require remote work, if able
- Outdoor visitation at long-term care facilities only

Perks of being fully vaccinated

NO QUARANTINE	<ul style="list-style-type: none">• if exposed to someone with COVID-19• after any travel, both domestic and international
NO TESTING	<ul style="list-style-type: none">• if exposed to someone with COVID-19 and are asymptomatic• before leaving the United States for international travel (unless required by the destination)
REFRAIN FROM WEARING A MASK	<ul style="list-style-type: none">• while visiting indoors with other fully vaccinated people or with unvaccinated people from a single household who are at low risk for severe COVID-19• while participating in outdoor activities and recreation, except in certain crowded settings and venues

What We Know About Those on the Fence

Nearly Half More Confident Than They Were 3 Months Ago

Are you more likely to get a COVID-19 vaccine now than you were 3 months ago?

Influential factors:

- Time
- Research
- Knowing vaccinated people
- Ease / convenience

Most concerned about unknown **long-term effects**

COVID-19 deaths by month

Moving down to high risk level

Effective Friday, May 7, Deschutes County will move from Extreme Risk Level to the High Risk Level. This means:

- Restaurants may have indoor dining at 25% occupancy (max 50) and up to 120 people outdoors
- Indoor fitness, recreation and entertainment may have 25% occupancy (max 50)
- Retail stores may have 50% occupancy
- Outdoor fitness, recreation and entertainment may have 15% occupancy

Get Vaccinated

**Get back to doing
the things you
love,**

**With the people
you love!**

Dine out with friends

Have a birthday party

Go to the gym
