COVID-19 Public Health Update

Nahad Sadr-Azodi
Director of Public Health

Dr Richard Fawcett
Health Officer

Dr George Conway
Administrator

BoCC meeting | August 26, 2020

QUIZ

What are the 3 Ds that we should understand and embrace?

- A. Demographics, dose and distance
- B. Discipline, duration and distance
- C. Dose, duration and distance
- D. None of the above

Flu vaccination

- Dry run
- Deaths, hospitalizations, miss work
- Multiple types
- All persons over 6 months
- Immunity = coverage x effectiveness
- Competing for limited medical resources
- Federal + State + Local partnerships

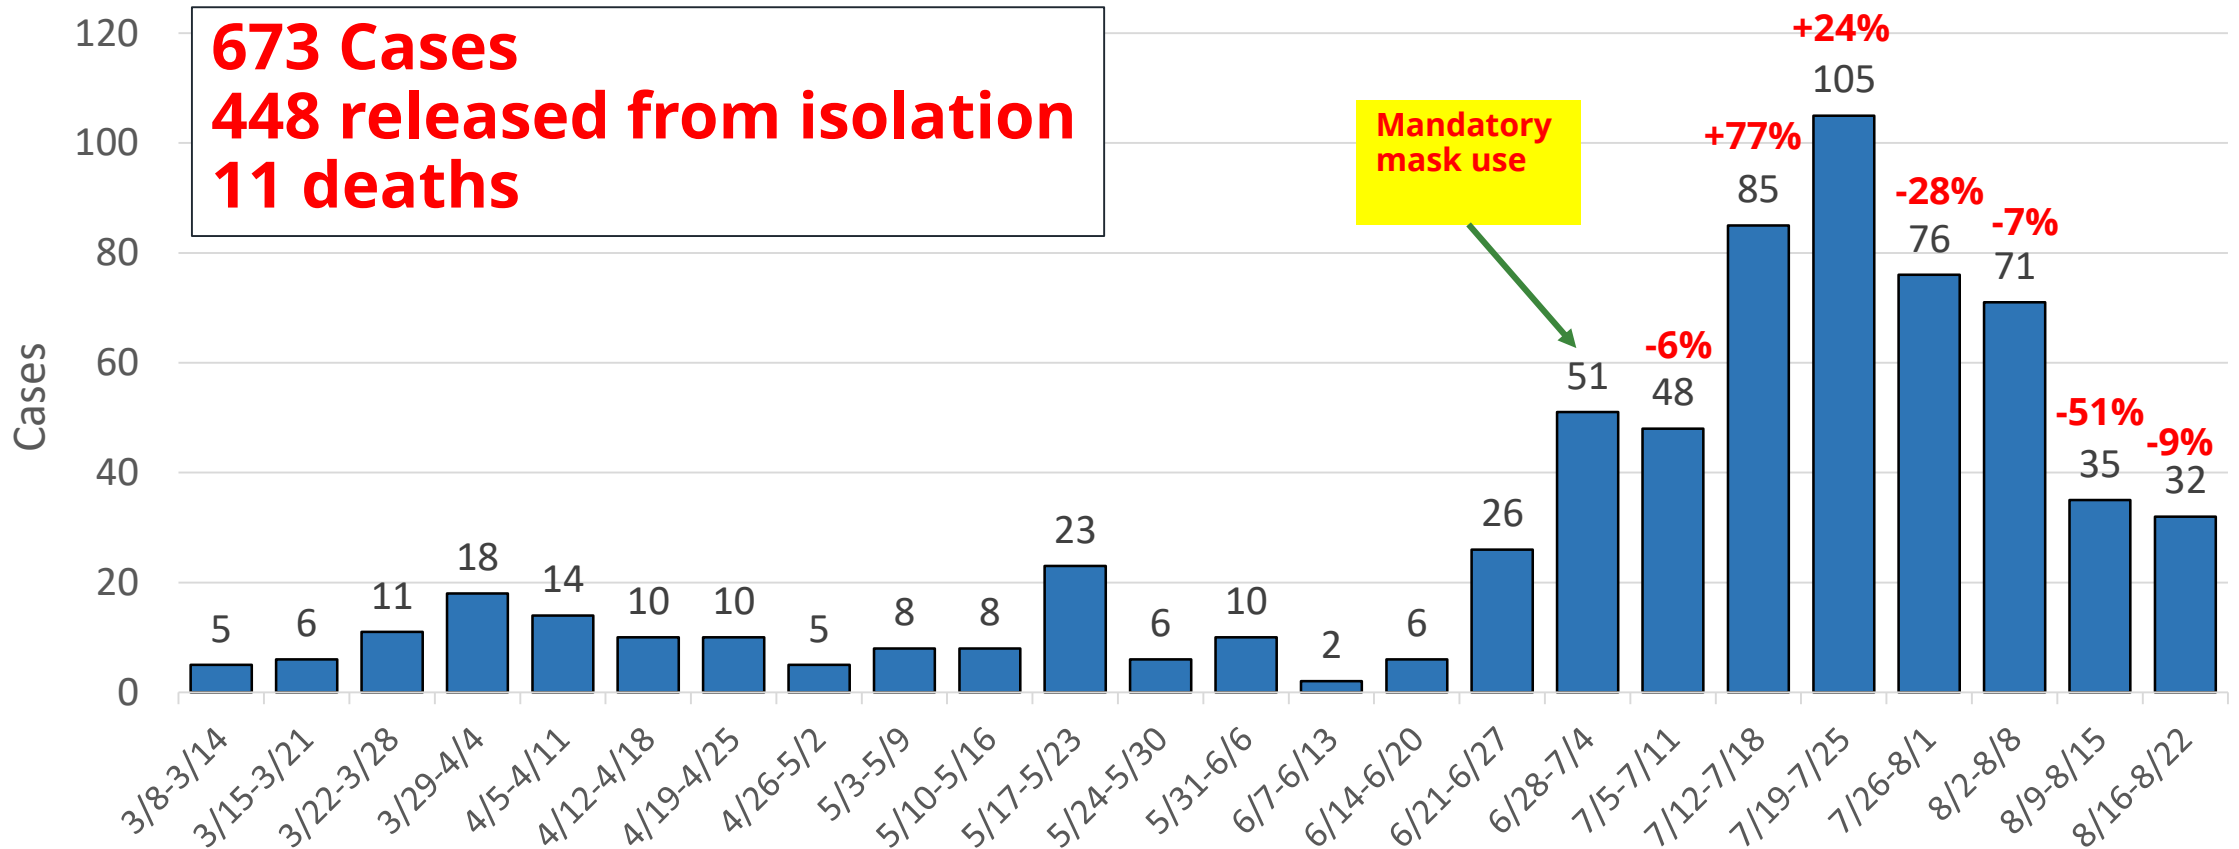

What we know?

~40%
**Asymptomatic or
Invisible**

Deschutes County Cases by Week

Deschutes County Cases (Cumulative)

Data are shown based on the date a case first became identified as a case.

Data as of 8/25/20

Deschutes County Cases by Age Group Breakdown

Deschutes County Cases by Age and Month

COVID-19 Test Site Finder: Get Information on Coronavirus Testing Near You

Powered by community. Brought to you by  Castlight

Share:     

Coronavirus test criteria and availability are changing daily. Check your state guidelines and call the coronavirus testing site before you go to learn about testing criteria, availability and hours.

- 1 If you are experiencing symptoms of COVID-19, such as fever, cough, or shortness of breath, please contact your healthcare provider or telehealth program to discuss whether you should be evaluated for testing.
- 2 Each coronavirus test provider will determine if testing is appropriate based on your symptoms, risk factors, and test availability.
- 3 **UPDATE:** Due to an increase in demand, there may be longer than usual wait times for testing and results in certain areas.

Daily Count of COVID-19 Patients Hospitalized (St. Charles Health System Data)

Deschutes County Hospitalization by Sex and Age Group

One case has unknown age and is not included in the graph above.

■ Hospitalized ■ Not Hospitalized

School Metrics: Case Rates per 100,000 population

Data are provisional and subject to change.

School Metrics: Test Positivity (%)

Data are provisional and subject to change.
Test percent positivity subject to change as more test results are received.

key messages

- Be kind
- Understand the 3 Ds
- Avoid the 3 Cs
- Do the 3 Ws

Kindness x 3 Ds x 3 Cs x 3 Ws =

**Deschutes United,
Caring, Smart.**

Common **mask styles** that DO NOT actually protect against **coronavirus**

The Earing

This person nailed step one of the process, perfectly looping the strap around that first ear, only to give up when faced with the daunting step two of looping it over the second. For people going for that elephant earflap chic aesthetic, the dangling surgical mask is perfect. For people looking to save lives, not so much.

The Dirty Napkin

Reducing waste is laudable when you're reusing grocery bags and to-go containers. But keep doing it with your mask and suddenly you're wearing something dirty enough to qualify as a mobile waste hazard. **Experts recommend that cloth masks be washed frequently.** But just washing it once would be a good start.

The Droopy Dog

If you're wearing one of those loose, stretched-out masks that hang limply from your face, you're not only decreasing your mask's effectiveness, but you're also indicating you've basically given up on trying at life. And when many America are still walking around in sweatpants and showering only every other day, that's saying something.

The Reverse Batman

There is still much we don't know about the coronavirus. But when it comes to breathing, the scientific community is pretty much in lockstep: It happens through the mouth and the nose. Therefore, that mask you've worn to cover the former but not the latter is technically better than nothing, but not by a lot.
