Hello,

As a resident of Sunriver Resort for 23 years, I have used every recycling opportunity available to us during that time. While I appreciate the convenience and no cost option of recycling at the SROA public works, it is clear that many people that use that facility are not willing to follow instructions.

The advantage of side yard recycling is that it puts the responsibilities squarely on each homeowner. For the non-resident owners who rent their homes this could create an issue. The rental companies are the ones who will have to deal with renters that are not responsible. I see this is the cost of doing business.

I don't have a problem with paying for having recycling picked up from the side yard. In our case we can already accommodate a rolling cart. I am interested to know if there will be options in frequency just as there are options for trash pick up. Our household creates more recycling than trash most weeks. We go to the landfill quarterly to recycle batteries, used oil and metal etc.

Thank you for addressing this issue. I look forward to hearing your solutions.

Sincerely,
Jody DeLand
