Hi Chad,

We listened to the Deschutes County Board of County Commissioners public hearing today.

We are residents in Sunriver and registered voters in Deschutes County.

We are fully supportive of the proposal for side-yard recycling collection - we think this service is essential in Sunriver.

We don't have as strong an opinion about whether the program be universal or subscription, although we do think a universal system provides some very valuable benefits, such as, spreading the cost over more homeowners and incenting people to use the recycling since they are already paying for it (if they have trash service).

Thanks to the Commissioner's work on this, we are very happy this proposal is hopefully going to move forward.

Best,
Don & Tina Freel
